AURADERM

FACIAL INTELLIGENCE PLATFORM

ESTETIKA MEDIKA

AURADERM

Introduction:

This advanced facial device is designed for cleansing, hydrating, and beautifying the skin, making it ideal for beauty salons, spas, and skincare professionals. It combines computerized skin imaging analysis with personalized cosmetic treatments to deliver a superior experience.

Main Features:

- **Non-invasive technology:** Non-invasive treatments designed to safely beautify and condition all skin types.
- **Intuitive user interface:** Quick selection of pre-configured programs and manual settings.
- **Ergonomic design:** Facilitates the handling of the maniples for a continuous workflow.
- **Computerized skin analysis:** Visual assessment of the skin with the option to recommend daily care products.
- **Artificial Intelligence (AI) Assessment:** Option to analyze up to 6 cosmetic skin parameters using AI.
- **Boost your sales:** Assessment tool that makes it easy to recommend skincare routines and complementary facial care services.
- **Build Customer Loyalty:** Allows you to structure personalized plans for continuous facial care, track visual improvements, and schedule maintenance sessions.
- **Differentiate yourself from the competition:** Leave behind beauty centers that only perform facial cleansing with a generic protocol and move to the next level of personalized facial treatment for your clients.

AURADERM

Handpieces of the new AURADERM

Skin Analysis Camera
Function: Captures detailed images of the skin's surface layer to assess aspects such as texture, pores, and visible moisture levels.
Benefits: It allows for personalized aesthetic sessions and shows the visual evolution of the skin's condition to the client.

Atomizer/Spray Handpiece
Function: Distributes a fine mist of toning lotions or moisturizing solutions onto the skin.
Benefits: Refreshes, hydrates and provides a feeling of relief and comfort after deep cleansing.

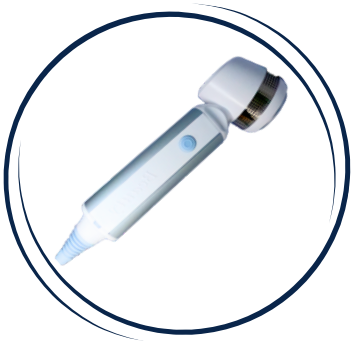

Vibrating Facial Massager Handpiece
Function: Generates gentle micro-vibrations to provide a relaxing massage to the facial area.
Benefits: Relaxes facial tension and promotes a fresh and luminous appearance.

Ultrasonic Handpiece:
Function: Uses ultrasonic oscillations to remove surface impurities and dead cells.
Benefits: Gentle, non-invasive exfoliation that leaves skin clean, smooth, and with an even tone

Handpieces of the new AURADERM

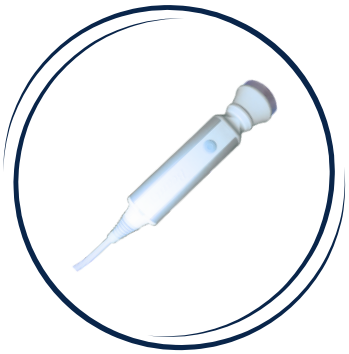

Thermal Handpiece (Cold / Heat):
Function: Alternates thermal sensations to prepare or soothe the skin during the session.
Benefits:

- Warming Mode: Comforts the skin and helps soften it for better application of cosmetics.
- Cooling Mode: Provides an immediate cooling and decongesting effect.

Hydro-Dermabrasion Handpiece
Function: Exfoliates and cleanses pores by combining gentle suction and cleansing solutions.
Benefits: Removes accumulated dirt and simultaneously moisturizes the skin surface.

Aesthetic Ultrasound Handpiece
Function: Emits ultrasound waves that promote the uniform distribution of serums and cosmetic gels.
Benefits: Maximizes hydration and improves the texture of dry or dehydrated skin.

Facial Aesthetic Radiofrequency Handpiece
Function: Applies surface thermal energy to promote a feeling of firmness in the skin.
Benefits: Helps smooth the appearance of fine lines and improves the visual elasticity of the face.
